

General Assembly, November 14th 2024
During the General Assembly (GA) on Thursday November 14 2024, we presented the LBBE's 2023 CO ₂ footprint and then focused on a few sectors: computing, travels, and purchases. We ended the GA by splitting in 3 groups (13, 9, and 7 people) working on ideas to reduce the footprint of computing, lab experiments, and travels.
