## 22nd National Congress on Transposable Elements

Publié le 30 juin 2019

We are pleased to announce the 22nd National Congress on Transposable Elements #CNET2019, that will be held in Lyon from July 8 to 10 this summer. It will be followed by the first satellite meeting MobilET bioinformatics days.

CNET 2019 gathers researchers with interests on topics related to transposable element biology, including molecular and cellular mechanisms, physiological impacts on organisms, comparative genomics, population & evolutionary studies, and ecology. We invite interdisciplinary contributions including molecular, genetics and cellular studies, as well as bioinformatics and mathematical modelling approaches, applied to a wide range of model organisms (prokaryotes, plants, yeast, insects, ciliates, vertebrates,...). The programme will include invited talks, selected talks and ample time for poster presentation and discussions. Junior researchers are encouraged to apply for oral presentations.

Invited speakers : Josefa Gonzalez, Frank Jiggins, George Kassiotis and Lionel Navarro

More information can be found at the #CNET2019 website <https://cnet2019.sciencesconf.org>

Please, share, retweet, talk to your neighbor, and see you in Lyon!
